

Blood Konnector Donor Dashboard

Final Version for IT Team

1. Overview

The Donor Dashboard is the central control panel for all registered donors. It allows them to manage profiles, update medical data, track donation history, control availability, chat with recipients, upload documents, and view their life-saving impact.

A. Welcome Section

- Purpose: To greet and summarize donor's essential info.
- Display Items: Profile Photo, Donor Name, Blood Group Badge, Availability Status (Available / Unavailable).
- Quick Buttons: Update Availability, Open Chats, View Donation History.

B. Profile Overview

- Full Name – Displayed as per registration
- Blood Group – Displayed in badge format
- Location – Auto + manual input (for nearby donor matching)
- Last Donation Date – With auto-calculated 'Next Eligible' date
- Total Donations – Counter of successful donations
- Donor Level – Bronze / Silver / Gold / Lifeline Hero (based on donation count)

C. Health & Eligibility Status

- Health Declaration – Displays details from health form
- Next Donation Countdown – 90 days after last donation
- Upload Reports – Upload or replace medical/blood test reports
- Verification Status – Verified / Pending / Rejected (admin approved)

D. Availability Management

- Availability Toggle – ON/OFF (Ready to donate or not)
- Emergency Mode – 'Available within 6–8 hours' switch
- Notification Trigger – Notifies nearby recipients when ON
- Custom Message – e.g., 'Available in Karachi till 9 PM'

E. Chat & Communication Panel

- Chat List – Displays all active and past chats with recipients
- Message Window – Real-time chat interface

- Quick Replies – Predefined messages ('On my way', 'Send location')
- File Attachments – Upload files, hospital forms, etc.
- Notification Alerts – Popup for new messages or urgent requests

F. Donation History & Activity (Expanded)

- Donation ID – Unique system-generated ID
- Recipient Name – Full name of the receiver
- Recipient Contact – Encrypted contact / app ID
- Hospital / Location – Hospital or blood bank
- Donation Date – Date and time of donation
- Blood Group Donated – Example: O Positive
- Donation Type – Regular / Emergency
- Units Donated – Example: 1 Bag = 450 ml
- Verification Status – Pending / Verified / Rejected
- Recipient Feedback – Rating / thank-you note
- Donor Notes – Personal remark (optional)
- Status – Completed / Canceled / In-Process
- Frontend Display – Table view + details popup with export options
- Developer Notes – Link Donation History to DonorID & RecipientID; enable filters and exports

G. Reports & Documents

- Upload Blood Test Report – Accepts .jpg, .pdf, .docx
- Upload Medical Certificate – Same formats
- Verification Panel – Admin-side approval system
- Report Status – Verified / Not Verified / Expired
- Download Option – Donor can view uploaded documents

H. Notifications Center

- New Chat Request – From recipient
- Urgent Need Alert – When nearby recipient requests matching blood
- System Updates – General notifications
- Verification Reminders – Reports or re-verification alerts

I. Donor Insights (Analytics)

- Total Donations – Counter with progress indicator
- Time Since Last Donation – Auto-calculated
- Eligible Again In – Countdown timer
- Nearest Active Requests – Based on location and blood type

- Monthly Graph – Donations vs requests fulfilled

J. Account Settings

- Edit Profile – Update info
- Change Password – Secure reset
- Manage Location – Manual + GPS update
- Deactivate Account – Temporarily hide profile
- Delete Account – Permanent removal request

K. Support & Help

- FAQs – Common donor questions
- Report Issue – Bug or complaint form
- Contact Admin – Chat or email support
- Feedback Form – Suggestions for improvement

L. Important Notice

- ■■ Please ensure all information is accurate and truthful.
- Any misuse or false data submission may lead to suspension or reporting to authorities.
- Blood Konnector verifies all donor details for safety and reliability.
- ♥■ Thank you for saving lives.

M. Developer Integration Notes

- Validation Rules – Donor age ≥ 18 years; Donation interval ≥ 90 days; Valid CNIC, phone, and location.
- Core API Endpoints – /donor/updateProfile, /donor/updateAvailability, /donor/uploadReports, /donor/chat, /donor/history, /donor/notifications.
- UI Modules – Dashboard Home, Chat Window, History Panel, Notification Sidebar, Reports Upload Area, Analytics Page.
