

PerfillReceiver Dashboard

Overview: Personal control center where recipients can track requests, manage communication, view donor responses, and update status.

A. Profile Overview

- Profile Photo
- Name / Age / Gender
- Blood Group needed
- Verified Badge (if admin approved)
- “Edit Profile” button

B. Active Blood Requests

- Request ID – Auto-generated
- Status – Pending / Approved / Matched / Completed / Canceled
- Blood Group Needed – From form
- Units Required – Numeric
- Urgency – High / Normal / Flexible
- Hospital / City
- Doctor Name
- Date Created
- Action Buttons – View Details / Edit Request / Cancel

C. Matched Donors & Chat System

- List of matched donors with Donor Name / Blood Group / Location / Last Donation Date / Availability
- “Chat Now” button → opens secure in-app chat
- “Request Call” button (optional)
- Logic: When a donor marks Emergency Available = Yes, a notification appears to recipients searching for that blood type.

D. Communication & Updates

- Notification Center: System messages, donor replies, admin updates
- Chat History: All conversations with donors
- Status Tracker: Request Posted → Donor Matched → In Communication → Donation Completed

E. Donation History (Log)

- Donation ID – Auto-generated

- Donor Name – Matched donor full name
- Donor Contact – Masked info / app ID
- Blood Group Received
- Units Received
- Hospital / Location
- Date of Donation
- Status – Pending / Completed / Canceled
- Verification Proof – Upload receipt or admin mark
- Recipient Feedback – Short note or thank-you message

F. Reports & Documents

- Upload additional medical or lab reports (JPG / PDF / DOC)
- View previous uploads
- “Share with Admin” toggle for review

G. Account & Support

- Profile Settings (edit details, change password)
- Help Center (FAQs + live chat with support)
- Report a Problem (form + screenshot upload)
- Logout button

H. Backend & Algorithm Notes

- Auto-Matching Logic: Match recipient blood group with donors having same or compatible types; filter by location radius (≤ 25 km); check donor availability and last donation date ≥ 3 months
- Security: Encrypt all health and contact data; Two-step verification for emergency requests
- Admin Access: Full control over request approval, data audit, and activity logs
