

Testing result

(According to the Provided Files by client)

(01). Registered as a donor form.

[1. Donor is unable to edit his profile.]

(2). donor dashboard details.

1. No name of profile showing in dashboard.
 2. donor is active, but it should not be active if he has donated blood recently within four months.
 3. Next donation countdown is missing.
 4. unable to upload reports or replace reports of health of Donor (it should be optional for donor)
 5. total donations count is missing
 6. Donor availability toggle is missed. (Means Donor can active or deactivate his profile, it's profile will not show in the list and he will not get notification and request, recipient can't send request)
 7. Emergency availability on/off BUTTON missing.
 8. chat screen is not stable, it flips up and down during the chat, not stable properly.
 9. no chat list found.
 10. no notification alert tone or anything pop up.
 11. Blood donation history is missing in dashboard. (The Money Donation options is available which is also required)
 12. donor insights complete section are missing (complete panel missed {Check the file for clarifications} .)
-

(3). Admin Chat options is on every page?but why?

(4). Lifeline Dashboard

1. Not Completed according to the Instructions.
- [Will update Details here]
-

5. Blood Donations Request Manager
Not Completed according to the Instructions.
[Will update Details here]

After Chat and approval This will happen

Below the chart, there's a button "Scheduling Donation."

1. After clicking the button "Scheduling Donation," a form will pop up to get the remaining details. Of the recipient.

2. When the recipient submits the remaining details, the system will ask the donor about the confirmation of the blood donation on this 23/03/27 date.

3. If the donor approves the donation confirmation. The system auto-generates a countdown and adds it to the dashboards of donors and recipients.

4. The system does remind both of them before a day of donation.

5. On the same day and before the time of blood donation.

6. After passing the time of blood donation. Like after 05 hours, the system will ask the donor and donors about the donation. Is it completed or not?

They will confirm about no, yes, or rescheduling.

If it's rescheduled, it will ask about the next date and time and reschedule it.

If its no. The system will count it as a failed donation.

If yes, the system will add it as a successful donation.

In. The three scenarios are yes, no, and rescheduled. The system will get the remarks about the service. It's important.
